

MORTUARY CABINET

MINUS40

6 TIER CABINET

6 Tier Mortuary Cabinet

Discover a realm of durability and sophistication with Minus40's meticulously crafted 6-door Mortuary Cabinets.

Rooted in quality, these cabinets come standard in Medical Grade Specification, showcasing robust 430 Stainless Steel construction. However, for those who seek the pinnacle of excellence, the option to upgrade to Forensic Grade Specification (featuring 304 Stainless Steel construction) is available.

They feature a built-in cooling plant (self-contained), but an alternative option allows for changing the cabinet to a remote unit, where the condenser refrigeration unit is mounted remotely.

Experience Temperature Precision

Experience the art of temperature control like never before. Select units designed for Freezing (-15°C to -20°C) or Fridge (2°C to 10°C) refrigeration capabilities. Every cabinet boasts a state-of-the-art digital temperature control display, complete with fault alarm settings that are both audible and visual.

Seamless Functionality

Embrace functionality at its finest with Minus40's mortuary cabinets. These cabinets come with adjustable feet for seamless placement, ensuring they stand strong wherever you require. Each body tray is secured with lockable doors, providing the utmost care and security.

Peace of Mind with Minus40

Rest easy knowing that Minus40's legacy of reliability and excellence supports every cabinet we offer. Our Mortuary Cabinets are backed by the dependable Minus40 service warranty. For an extra layer of assurance, consider our optional annual service agreement, tailored to suit your needs.

100mm Polyurethane Insulation

Body Trays Included

Stainless Steel Interior & Exterior

Features

- ✓ Digital Temperature Display
- ✓ Lockable Doors
- ✓ Levelling Feet
- ✓ High/Low Temperature Alarm
- ✓ Operations Manual
- ✓ Easy Maintenance & Cleaning Access
- ✓ 555mm Body Trays Included
- ✓ Capacity For Obese Body Trays
- ✓ 100mm Polyurethane Insulation

Refrigeration

Capacity (Bodies)	6
Temperature range (Fridge)	2°C to 10°C
Temperature range (Freezer)	-15°C to -20°C
Max Ambient Operating Temperature	45°C

High-Density Polyurethane Insulation

Minus40's Mortuary Cabinets feature panels, flooring, and ceiling with a 100mm layer of insulation. This insulation is crafted from high-density polyurethane foam, which is both environmentally friendly and free from HCFC & CFC chemicals. The doors of these units are fully reversible and also incorporate high-density polyurethane foam insulation.

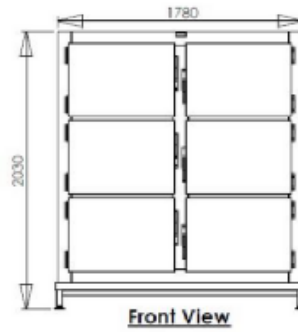

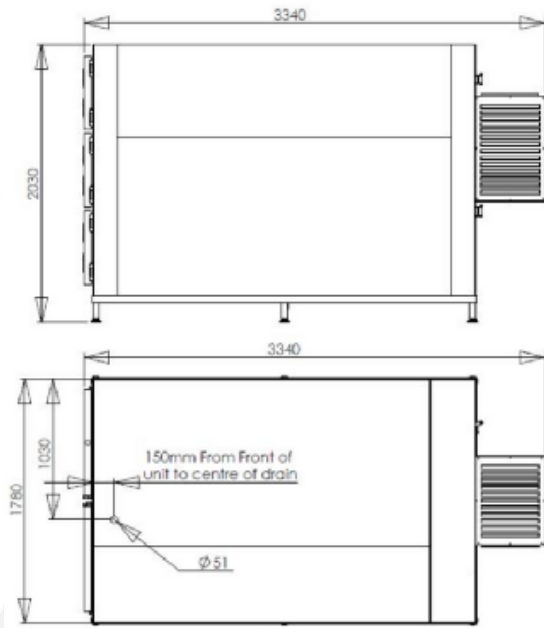

The exclusive use of polyurethane foam insulation by Minus40 brings multiple advantages. Notably, its low thermal conductivity inhibits effective heat transfer between surfaces, ensuring that cold temperatures are maintained effectively within refrigerators. This aspect contributes significantly to energy efficiency; by reducing the need for constant cooling, less energy is consumed in the refrigeration process.

REQUIRED BEFORE PURCHASE

1. Ensure the area is well ventilated for optimal functioning;
 - 1700M³ / Hour Ambient Ventilation Required
2. A 25A single phase Isolator power supply.
3. Ensure the area size will facilitate the unit adequately.
4. A 40mm Floor Drain Connection is required.
5. If the area reaches more than 45°C, our Minus40 High Ambient 6 Door Cabinet would be more suitable. These units were designed to operate in conditions of up to 55°C.

MEDICAL VS FORENSIC

The main difference between the Medical and Forensic cabinets are the materials used in the design.

Medical cabinets and body trays are constructed of 430 grade Stainless Steel that significantly reduces the material cost.

Forensic cabinets and body trays are constructed of 304 grade Stainless Steel which includes the following benefits:

- It is highly polished for better hygiene conditions.
- Has a higher corrosion resistance.
- Prevents bacterial growth.

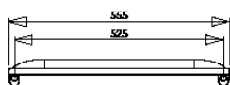

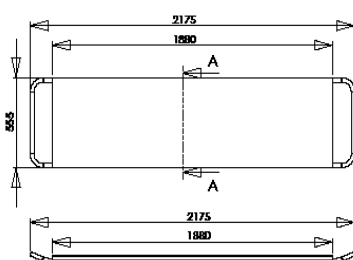

The Forensic option is advised for long term storage and mostly used within universities and laboratory settings.

OPTIONAL EXTRAS

This cabinet comes equipped with 6 standard Medical Body Trays (555mm wide). However, we highly recommend;

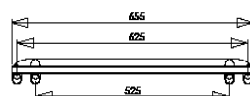

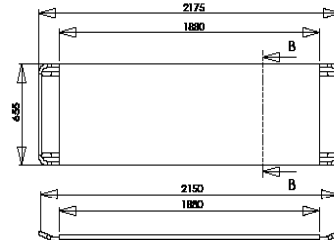

- Substituting one or more Standard Body Trays for an Obese Body Tray(s) (655mm wide).
- For long term storage, we recommend Forensic Body Trays (555mm or 655mm wide).
- High Ambient cabinets are available for 55°C conditions.
- A "Remote" version of this cabinet is available - This is when the condenser refrigeration part of the cabinet is mounted remotely and is not attached to the back of the cabinet.

Standard Body Tray
